I did an impromptu presentation for the [Dallas / Fort Worth ColdFusion User Group](#) a couple of days ago, filling in for someone who was supposed to present on [ValidateThis](#) but was unable to make it to the meeting. I delivered the presentation that I gave at both [cf.Objective\(\)](#) and [CFUnited](#) last year.

[Dave Shuck](#) was kind enough to record the presentation and [make the recording available](#), so if you're interested in watching it you can do so. I will warn you that the recording is around 90 minutes long because I tended to talk quite a bit throughout the presentation (as it was an informal preso), although I do believe that most of the information I was providing was useful.

If you do [watch the presentation](#) and have any questions about ValidateThis please feel free to send your questions to the official [ValidateThis Google Group](#).

I'd like to thank Dave and the DFWCFUG for giving me the opportunity to present to them. If any of you are UGMs and are looking for a remote presenter I'm always available and interested, and can present on a number of topics.
