I mentioned in my [last post](#) that I created a demo which uses the new ValidateThis! Coldbox plugin to integrate VT with CB. That demo is now available online at [www.validatethis.org](http://www.validatethis.org).

Note that only the Edit User page has been updated to make use of VT.

Also, if you're looking for a copy of the Coldbox Plugin it is available in the /extras folder of the framework download, which can be found at the [Riaforge site](#). I'm also attaching just the plugin file to this blog post.
