Related Categories: CFSelenium

A new version of [CFSelenium](#) was released today which upgrades the bundled version of Selenium Server to version 2.20.0, and also includes improvements to the waitFor helper methods. Those improvements were contributed by [Michael Wilson](#).

As always, the latest version is available via the [CFSelenium RIAForge page](#) and via the [CFSelenium GitHub Project](#). The latter also includes a detailed [Readme file](#) which can help you get started using CFSelenium.

Many thanks to Michael for his contribution.
